

What does it mean to be a Special Needs Orthodontist?

- ***Extra Training*** - In order to properly care for patients who have special needs, Dr. Amy and Dr. Andrew have received advanced training in special needs orthodontics. We understand that our special needs patients may have other complex issues which can impact their orthodontic treatment, and our team is trained to cater to each patient's needs individually.
- ***Flexible Scheduling*** - Most special needs children do better in a calm environment, with less people and less distractions. We get this and are happy to accommodate requests for an after-hours appointment. Just give us a call or shoot us an email and we will work with you!
- ***Understanding Team*** - We've been in your shoes! As a parent to a special needs child, Dr. Andrew has lived through the experience of having an anxious, hysterical child in the dentist's chair. As a result, he and Dr. Amy have made it a priority to screen for and hire staff that share the same inclusive values. The team is interested in doing whatever it is your child needs to feel comfortable with treatment, so we encourage you to share your child's special circumstances with us and/or any ideas you might have to help make the visit as successful as possible.

OUR VALUES:

- 🦷 **Compassion**
- 🦷 **Patience**
- 🦷 **Adaptability**
